Stool Repel-UM

Coprophagia is a behavioural condition with puppies and dogs consuming their own faeces. This is a common habit in some dogs which can be distressing for the pet owner and unhygienic for the pet. Mark and Chappell Stool Repel-UM tablets have been specially formulated to help deter this behaviour.

When the active ingredients are ingested by the animal they become activated in the small intestine and may help to produce a stool which is unpalatable to the animal.

Stool Repel-UM Benefits:

- ✓ Helps Eliminate Stool Eating
- ✓ Behaviour Aid
- ✓ Safe & Effective
- ✓ Tasty Formulation

Composition:

Brewers dried yeast

Additives (per kg):

Alpha-amylase	280,000	mg/kg
Oleoresin capsicum	45,500	mg/kg
Natural flavouring	15,000	mg/kg

Directions:

Puppies & Dogs: Suitable for dogs and puppies aged 6 months and over. Give one tablet per 10kg of bodyweight daily for 2 weeks after coprophagy is first observed. If results are not satisfactory, double the quantity of tablets and administer for 2 more weeks. As a prevention, continue to feed 1 tablet daily. Increasing the physical activity of your pet and feeding a high quality diet may also assist in stopping this behaviour.

Warnings:

Complementary Pet food,
For animal use only,
Store in a cool, dry place away from direct sunlight,
Keep out of reach of children
This product is intended for intermittent or supplemental feeding only,
Fresh water should always be available
